

EASY-CHECK FE/FE-S/FN

The world's first pocket-size Coating Thickness Meters with a swinging probe for measuring on ferrous and non-ferrous metals (EASY-CHECK FN: both magnetic-induction and eddy current technique).

NEW: Now available with 1.5 V Mignon battery or 1.2 V rechargeable battery - High performance at a favourable price !

MEGA-CHECK 5F

Practical and easy to operate device with fixed probe F-5 for measuring coatings on steel up to 5 mm (200 mils) (magnetic induction technique).

MEGA-CHECK 5FN-ST

With fixed probe FN-52AT for measuring coatings up to 5 mm on steel (FE) and 2 mm on non-ferrous metals and non-magnetic steel (NFE). Includes memory for 500 readings, statistics and interface RS 232

MEGA-CHECK 10-ST

All types of probes (pluggable) can be used. - Features: SCAN-Function on rough surfaces, memory for 2000 readings, statistics and interface RS 232, display of all readings stored.
