酵素免疫分析儀 建議售價 125,000 元

- ChroMate® is a compact and economical 8-channel microplate reader.
- ChroMate® reads absorbances of 96 wells in about 12 seconds.
- ChroMate® offers a streamlined design with minimal footprint and superb optics to fit any size lab bench.
- ChroMate® and your PC team up to provide full access to high level software, reporting, curve fitting, and data storage to meet the requirements of modern laboratories.
- ChroMate's® versatile and flexible software comes ready to "plug and play" on a flash drive pen (included), and includes the following calculation modes:
 - *Absorbance,*
 - *Cutoff, Cutoff Control, Cutoff Calibrator,*
 - *Point-to-point curve fit,*
 - *Multipoint % absorbance,*
 - *Linear regressions, (linear, log, logit-log),*
 - *Polynomial and Sigmoidal regressions (2nd, 3rd, 4th order, dose response, cubic spline).*
- ChroMate® permits the user to select plate layout options, and customize layouts for individual tests or panels/screens.
- ChroMate's® software includes critical QC tracking, with individual selections for both calibrators and controls, absorbance or concentration, for mean, SD, CV, plus Levey-Jennings plots, and more.
- ChroMate® provides a patient database with multiple reporting options.
- ChroMate® uses [IAD filters](#).
